

Drive quality.

When you hear the solid closing of the door, you'll understand. Ford is in a dead heat with Toyota when it comes to quality.¹³

Drive green.

An efficient 6-speed transmission and impressive 24-mpg fuel economy¹ make Flex one of the friendliest ways to transport 7 people.

Drive safe.

Ford has more 5-Star crash test ratings⁸ than any company in U.S. history. With 6 standard airbags, Flex is ready to pass the test.

Drive smart.

Available Ford SYNC[™] communications and entertainment, SONY[®] premium audio, voice-activated navigation, even a refrigerator. Clever.

Drive one.

FLEX 09

Drive one.

SPARKS WILL FLY

when *this* surges through the city

THIS IS FLEX

it's not your average ride

So get ready to experience it.

Flex isn't easy to describe.
But you'll know it when you see it.

The design is simple: stacked forms in perfect proportion.
Like modern architecture on wheels.

Deep grooves stream down the bodysides,
seeming to move forward, even when Flex is standing still.

Up front: a gleaming chrome grille.
Up top: an available color-contrasting lid.

And always surrounding it: curious stares
and a barely audible "WHAT'S THAT?" as Flex cruises by.

IT RAISES EYEBROWS and expectations

But most of all,
Flex raises questions.

Actually, it's a crossover.

2 in front, up to 3 in the middle,
2 in back.

Loaded with technology
like available voice-activated
communications and entertainment.

A 3.5L V6. 6-speed auto.
24 mpg on the highway.¹

It's got you covered. 6 airbags,
including a 3-row Safety Canopy® System.
Even a rollover sensor. All standard.

White Suede. Brilliant Silver.
Or body-color roof. Your choice.

If you're a doer, not a dreamer,
then yes — perfect for you.

Flex Limited. Cinnamon Metallic (left). Dark Ink Blue Metallic (above). White Suede roof. Available equipment.

IT SHIFTS YOUR ATTENTION

to the details

Inside here, craftsmanship abounds — from the sparkling chrome accents, to the careful stitching on the leather-wrapped shifter. Even the clock, which glows an ice blue, is carefully designed and flanked by horizontal lines like the grooves that define the outside.

Listen. Nothing... but peace.

The fact of the matter: Flex is one quiet crossover, thanks to engineers who carefully applied sound-deadening insulation, specified a 6-mm-thick windshield, and selected road noise-quieting tires.

So keep your eyes — and ears — open.
There's a lot more thoughtful attention to come.

IT TINGLES SPINES

like the electric buzz of night

Turn the key. Turn the corner.
And expect to turn some heads.

Flex isn't just exciting to look at —
it's exciting to drive.

It's all in how Flex moves.
It hunkers down and puts a limit on lean,
so it grabs the corners without the ungainliness
of less lithe vehicles.

A new, fully independent rear suspension
helps by soaking up bumps and potholes.

A 3.5L V6 with 262 hp and 248 lb.-ft. of torque
provides enough gusto to quicken your heart rate.

It's paired with an uncommonly efficient
6-speed automatic transmission,
a combo that promises one of the best EPA ratings
in the class² — up to 24 mpg on the highway.

Change it up.

24 mpg
highway

Flex SEL. Sterling Grey Metallic. White Suede roof. Available equipment.

IT TANGOS WITH THE UNPREDICTABLE

without missing a step

In addition to standard front-wheel drive, Flex offers the confidence of available automatic All-Wheel Drive (AWD).

This intelligent system distributes up to 100% of the available torque to the tire or tires with the most traction. After all, Flex doesn't believe in spinning its wheels.

On top of that, every Flex includes Traction Control to prevent wheel slip during acceleration, as well as this brilliant technology:

Ford's AdvanceTrac® with RSC® (Roll Stability Control™)³
It's the only system in the industry that uses
2 gyroscopic sensors to monitor both yaw and roll motions
to provide side-slip control *and* roll stability control.

It's always on and always working. Just follow its lead.

All-Wheel Drive helps tackle unknown terrain **Traction Control** helps move you forward

AdvanceTrac helps prevent skidding **Roll Stability Control** helps keep the shiny side up

Flex SEL. Sterling Grey Metallic. White Suede roof. Available equipment.

IT OPENS EYES

and lifts spirits

In here, you'll forget you're actually *in* at all.

An optional multi-panel Vista Roof™ welcomes the sky for all 3 rows to enjoy.

Over the front seats, a sliding moonroof breathes in the fresh air. The 2nd and 3rd rows each get their own overhead windows.

With panoramic views like this, Flex may soon become your personal skylight lounge. Just sit back and soak in the city.

IT'S ALL ABOUT YOU

in fact, it even suits your mood

The provocative exterior of Flex and those cool grooves travel inside, creating an inviting "horizon line" that opens your view like the great outdoors. In other words, wide-open glass above; instrumentation below.

Uncluttered. Crisp. Contemporary.

For a more personalized driving domain, choose available Ambient Lighting. It'll brighten the front cupholders, footwells and 2nd-row control center in any of 7 hues to match your mindset. Happy. Mellow. Or anything in between.

IT GRANTS YOUR WISHES

you talk, SYNC listens™

Step inside Flex with your compatible, paired Bluetooth®-enabled phone or plug in a portable digital media player.

It'll know you've arrived. Press a button on the steering wheel, speak your mind (say, "call the office"), and it follows your commands.

The magic? Ford's exclusive SYNC™ system.⁴ Developed in association with Microsoft®, SYNC is an available voice-activated, customizable media system that lets you make calls, take calls, change up music and more — all while keeping both hands on the wheel.

To connect your digital media player, just plug it into the USB port. SYNC even charges most players while you're enjoying your tunes.

Visit SyncMyRide.com for the latest information about exciting new features.

IT BRINGS THE BEST IN AUDIO FIDELITY

to your ears only

Flex is the first vehicle in North America to offer a factory-installed SONY® audio system with surround sound and SONY DSP processing⁵

This amazing system uses the latest Dolby® Automotive Entertainment Program technology to bring the home theater performance of Dolby Pro Logic® II into your vehicle.⁶

390 watts of continuous power, 12 high-quality speakers and 2 amplifiers work together to deliver SONY's certified, unique, rich sound.

Clearly, it's like nothing you've ever heard before.

IT IS ROCKET SCIENCE

right from satellites to your screen

A single glance, and suddenly you become the most informed, up-to-date person you know.

This available voice-activated Navigation System integrates direction guidance with amazing functions including SIRIUS Travel Link™⁷ and a convenient Reverse Camera System. And it all displays on an intuitive, easy-to-read, 8" touch-screen monitor with bold, colorful graphics.

Gas prices, locations and details
Save money and time with Travel Link's surprising fuel price information. It includes over 120,000 stations nationwide, sorted by gas price, distance and name. It even shows you the route to the selected station.

Weather, sports, movies and more
Get a variety of local and national weather details, even radar maps and 5-day forecasts. Or tap into sports scores and upcoming schedules, plus obtain movie listings, schedules and more.

For travel directions, just enter or say your destination. Then get on your way, without worrying about the roads.

Thanks to the innovative SIRIUS Travel Link, you can access real-time traffic info, find the lowest gas prices, and even see what's playing at the local theater.

And that's not all.

Personal photo gallery and music storage
Leave home but take what matters — family. Display your own photos on-screen, or split the screen to show shots and other info, like songs from SIRIUS Satellite Radio stations or from the 10-gig jukebox.

The image shows the interior of a Ford Flex Limited, specifically the second row of seats. The seats are upholstered in black leather with horizontal stitching. The dashboard and center console are visible, featuring wood trim and a large infotainment screen. The overall atmosphere is dark and sophisticated.

IT STRETCHES ALL THE RULES

not to mention your legs, arms and other body parts too

See that 2nd-row lounging room?
It's enough to make a limo green with envy.

Simple truth: Flex has the most
expansive 2nd-row space in its class.

IT GIVES YOU THE OPTION

to truly chill out

Pop in a beverage at room temp; pull it out later at a cool 41°. The secret is an available compressor-driven refrigerator, conveniently located in the center console between the 2nd-row bucket seats.

It not only chills; it freezes.
Down to 23°. That's c-c-c-cold.

IT LIBERATES YOU

with power at your fingertips

No keys? No problem.
Integrated into Flex's driver-side door pillar is a marvelously convenient innovation: our newest SecuriCode™ keypad. Your touch lights it up. Enter your code and the doors unlock and the interior lights turn on.

Suddenly you're free from bulky pockets.

Heated front seats are standard on SEL and Limited models. 2nd-row warmers are available on Limited too.

Dual-zone Electronic Automatic Temperature Control (standard on SEL and Limited) maintains 2 separate environments up front. All models give rear passengers their own auxiliary controls.

Plug in a laptop or other small electronic with the available 110-volt inverter. It's located right behind the front console.

IT UNLIMITS YOUR OPTIONS

with comfort for up to 7

With room this large and luxurious, the challenge is finding space to describe it. So this'll be brief.

There's a comfortable 6- or 10-way power driver seat up front.

In the middle, a 60/40 split bench (to seat 7). Or choose a pair of optional reclining bucket seats and available console.

In the rear, a 50/50 split bench.

It all fits.

Push the available power folding button, and the 2nd-row bucket seat magically flips up out of the way for instant access to the 3rd row.

Every passenger seat folds down for a totally flat loadfloor that's so cavernous, we'd need 2 more pages just to show it.

Even with all seats upright, there's plenty of deep-well storage behind.

Fold down the driver-side seats for long items.

Fold down all passenger-side seats for almost 10' of clearance from front to rear.

Fold down all passenger seats and carry almost anything.

IT THINKS AHEAD

even when it looks behind

The worst way to start your morning is with the "clunk" of a garbage can and your bumper at 6 a.m. The standard Reverse Sensing System helps put a stop to that.

When you're backing up slowly, its sensors alert you with audible signals to certain objects behind the vehicle that may not be visible, so you can avoid contact.

Flex also features a Reverse Camera System as part of the available voice-activated Navigation System. It uses a tiny, state-of-the-art camera to deliver a full-color image to your 8" screen.

So you can see exactly where to go.
And where *not* to go.

There's really only one way to look at safety:
seriously and carefully.

At Ford, we do it every day,
developing systems that will help protect you and your passengers
on today's always-changing, distraction-filled roads.

The results of our commitment?
Ford has received more 5-Star crash test ratings⁸
than any other automaker in U.S. history.

And that means the world to us.

IT GOES ABOVE AND BEYOND for what matters most

Airbags. Yes, they protect. Flex
has 6 in total, including dual-
stage front, front-seat side, and
the Safety Canopy[®] System
featuring 3-row side-curtain
airbags and a rollover sensor.

Just like your rib cage, Flex's structure is designed to protect what's inside. Thanks
to extensive computer-aided engineering tools, it provides outstanding crashworthiness.

Part of this is Flex's class-exclusive SPACE (Side Protection And
Cabin Enhancement) Architecture[™] — an energy-absorbing design
with a hydroformed cross-car beam between the door frames
to strengthen each bodyside. A strong roof crossmember adds
strength. At the front, an energy-absorbing structural member,
front bumper plate, and tunnel rails assist in front impacts.

As you'd expect, all of this is in addition to
features like a collapsible steering column,
Tire Pressure Monitoring System and more.
All standard equipment on every Flex model.

IT'S NOT FOR EVERYONE

which makes it just right for you

IT EVEN INSPIRES DESIGNERS

Just ask Foose and Funkmaster Flex

When master designer and star of "Overhaulin'," Chip Foose, and New York City-based urban legend, Funkmaster Flex, caught a glimpse of Ford's latest release, they knew they had to get their hands on it.

Check out their interpretations. But sorry, we're not giving these up. You'll have to create your own.

Funkmaster Flex hit it hard and scored a TKO with signature Brandywine paint by House of Kolor,[®] faux brushed-aluminum roof, 3dCarbon fender vents, grille and spoiler, and Borla[®] dual rolled exhaust tips. To pack more punch, he lowered the suspension and squeezed in NC Forged custom 22" rims. Under the metal: Katzkin[®] custom seat covers, a blistering SONY[®] sound system, INVIsION DVD headrests, custom aluminum accents and, of course, the Funkmaster Flex logo. This bad boy comes out fightin'.

Foose went for chic and savvy with a custom-mixed, 2-tone blue and cream pearl sheen, lowering kit with customized Eibach[®] springs, and huge Foose Design 22" wheels. To bring on the bling, he accentuated the side grooves with custom fascias and rocker panels, stretched chrome all around, added unique upper and lower grilles with bold "FORD" lettering, and modified the door handles. Inside, 3-tone blue, gray and tan hides from Katzkin Leather and a unique tan suede headliner seal the deal.

**IT INTRIGUES
IT EXCITES**

it dares you to experience

So go ahead.

Defy the humdrum.

Invite the interesting.

Stimulate your senses.

It's time.

FLEX
